

# LAMINATE FLOORING

## Installation Guide

Proper installation of our products is needed to ensure long lasting reliability and durability. Ensure to use our floor coverings for indoors only.

**Laminated Wood** is an eco-friendly alternative to natural wood flooring, it's cost effective and easy to install as well; but like natural wood it can be damaged by water, thus ensure that our laminated wood is used only on the following areas:

### Approved locations

- Bedroom
- Living Room
- Dining Room

### Unapproved locations

- Comfort room/washroom
- Highly moist areas
- Balcony/Terrace
- Outdoor area

## Steps on how to install Laminated wood planks

- 1) The floor should be even and nearly flat, it should also be clean and clear of any debris to ensure a proper finish.
- 2) Unbox the planks to the work area and let it be exposed to the room for about 48-72 hours for acclimatization.
- 3) Acclimatization” is an additional step for laminated wood wherein the material adapts and expands by a few centimeters depending on the humidity and temperature of the room.
- 4) Clean the floor and place the 2mm HDF or high-density foam included on the purchase and place the laminated wood above the foam. This installation process is called “floating method” as the planks literally floats on the foam.

- 5) Place the planks and carefully attach each using the **clip-lock edges**. Use a **Jigsaw power tool** or **Metal hand saw** to cut the planks as needed.
- 6) Ensure a **10-12mm perimeter gap** between the edges of the room. Use a Silicone sealant, end cap or base board to cover this gap.
- 7) Install an **End cap, Reducer** or **T-mold** using a **liquid nail** if the laminated flooring will end or be place along ceramic tiles, carpet or a different flooring like vinyl or **AUC**.
- 8) After installation, sweep the floor, and use a damp cloth or mop to clean the laminate flooring for a clean and desirable finish.
- 9) For care and maintenance, only use damp cloth or a clean damp mop. Never use wax, varnish, or any bleach products as it may damage the planks.
